Innovation and stability: your review of 2024 with an outlook for 2025

Dear readers,

Another year is drawing to a close. The year 2024 was characterised by a challenging economic situation that presented many of us in the industry with new tasks.

Despite adverse circumstances, we can look back on a successful year that was characterised by innovation, stability and a clear focus on your needs as our customers and partners.

An important concern this year was to offer you a stable price structure despite rising costs. We will continue along this path in the coming year so that we can continue to offer you reliable products at fair conditions.

At the same time, 2024 was a year of progress. A large number of our F1 and F3 series drive controllers, which we presented to you in the [March issue of our info sheet](#), have been UL, PROFINET and STO certified and have already proven their worth in practice. With these certified solutions, we can guarantee you the highest safety and connectivity standards. In addition, our development team has implemented numerous new software functionalities, such as the innovative 'Event at value' function, to make your applications even more efficient and standardise processes.

Our participation in the SPS trade fair in Nuremberg in mid-November offered numerous personal encounters, stimulating discussions and exciting new contacts. The three valuable days at the trade fair showed us once again how much interest there is in our controllers and control solutions. The direct dialogue with you, our customers and partners, has motivated and inspired us. We are already looking forward to welcoming you again in person at the trade fair next year!

Looking ahead, 2025 will be a year full of exciting innovations. We are working flat out on a new generation of products that will bring pioneering technologies to your applications. We are also planning to expand our product portfolio in the field of top hat rail mounting in order to offer you even more flexible and powerful solutions.

At the end of the year, we would like to thank you for your trust, loyalty and excellent cooperation. We have achieved a great deal together and look forward to shaping the coming year with you.

We wish you and your families a peaceful Christmas season, relaxing holidays and a successful start to 2025!

Kind regards

Mike Rothe
